SWE 3613 The Honeycomb: Group 2

Jonathan Mathurin - Eric Bridges - Damon Heard

September 24, 2012

User Stories

Priority # 1
Estimated time: 10 hours

- As a teacher, I need a folder that will not allow submissions after a specific time and date for assignments given to students.

Priority # 2
Estimated time: 12 hours

- The system needs to have each students email directly linked to their own storage space. This will ensure only one per student. An email needs to also be sent for confirmation.

Priority # 3
Estimated time: 10 hours

- As an admin, I need the ability to warn and if need be black list users. Warnings will be sent to that users email. A list of blacklisted users needs to be accessible.

Priority # 4
Estimated time: 18 hours

- A database to hold all the files needs to be created so that more storage space can easily be added when needed

Priority # 5
Estimated time: 15 hours

- User accounts need to be secure. User password security needs to exist. For example something to make the users use all different text types.

Priority # 6
Estimated time: 8 hours

- As a user, I need the ability to reset/recover my password in case of loss.

Priority # 7
Estimated time: 15 hours

- As a student using the online store system, I want to be able to see other students in my class. So I may view and share files such as group papers and homework.

Priority # 8
Estimated time: 4 hours

- As a user, I want to know how much storage space I have left on my account, so I can delete less important files.

Priority # 9

Estimated time: 6 hours

- As a user, I want to be notified through email if any major changes to my account information occur.

Priority # 10

Estimated time: 18 hours

- As a user, I want the web-based storage system to be able to function on all browsers. (Internet Explorer, Chrome, Firefox, … etc)

Priority # - Completed

Estimated time: 22 hours

- As a student, I want an online storage space that can be accessed anywhere, so that I may store information such as school work.

Priority # - Completed

Estimated time: 24 hours

- As a teacher, I need to create a class specific online storage space so that students can have access to see or download any class related document.

Priority # - Completed

Estimated time: 5 hours

- There must be a terms and conditions form that a user must agree to prior to account confirmation.

Priority # - Completed

Estimated time: 16 hours

- I need the online storage system to operate like an operating system's file directory. Meaning files need the ability to be renamed, copied, deleted and etc.
